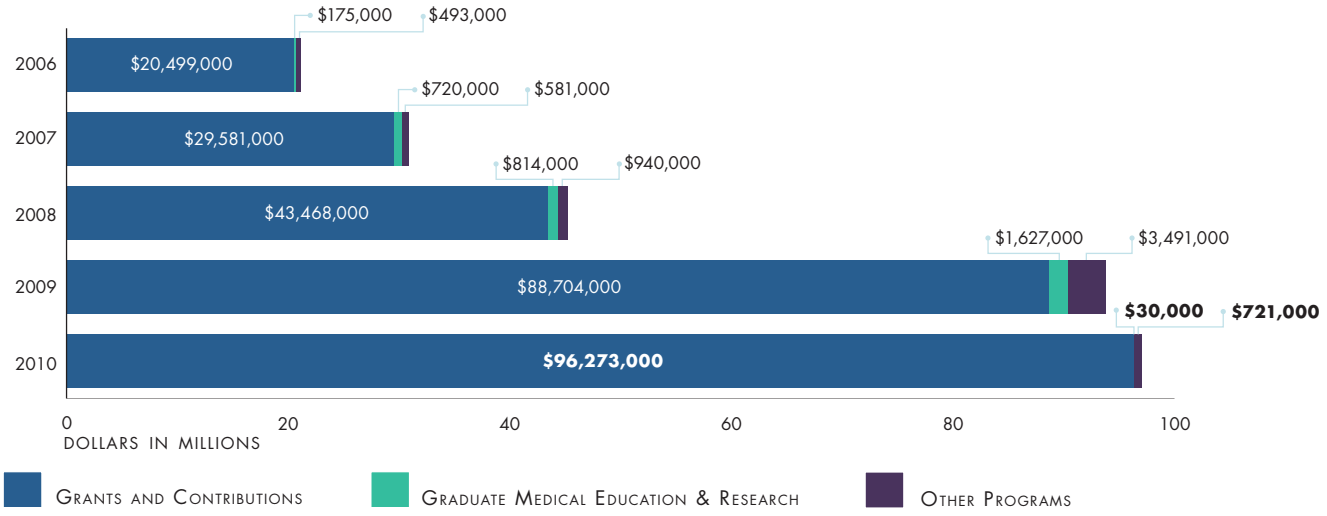
COMMUNITY
INVESTMENT

The Colorado Health Foundation's vision is "together we will make Colorado the healthiest state in the nation." We believe "together" is the most important word in that statement and the majority of our annual investment goes directly to grants and contributions to the hundreds of nonprofit organizations, government agencies and other groups that work to improve health and health care in Colorado.

We also operate and fund six graduate medical education (GME) residency programs that train physicians and a school for medical laboratory training. Our yearly spending in these areas represents our annual Community Investment.



■ **GRANTS AND CONTRIBUTIONS** represent funds committed by the Foundation's Board to be distributed directly to nonprofit and public organizations and do not include expenses associated with grant administration.

■ **GRADUATE MEDICAL EDUCATION** represents the investment required to operate the Rose and Swedish Family Medicine residencies, the Transitional Year Internship, the University of Colorado's Internal Medicine Residency at Presbyterian/St. Luke's Medical Center High Street Clinic, the Highlands Podiatric Medicine and Surgery Residency, and the Colorado Center for Medical Laboratory Science.

■ **OTHER PROGRAMS** represent the subsidies required to operate Foundation initiatives including the Colorado Health Symposium and Colorado Health Report Card, as well as restricted fund expenditures.
