

The Colorado Health Foundation™

Video Guide to the Telehealth Issue of Health Elevations

In a typical week, veteran Roy Hamilton enjoys running, biking, kayaking, and more. He does all of this with the support of Adaptive Adventures and doctors who he meets with personally and remotely, using telehealth technology, to stay healthy and maintain the specialized prosthetic legs designed especially for him and his active lifestyle.

This video was originally created as a companion to the Fall 2016 issue of Health Elevations.
